3. DESIGN PHASE	5
4. IMPLEMENTATION OF THE CODE	6
5. OUTPUT	33
6. CONCLUSION	40

ACKNOWLEDGEMENT

We would like to express our gratitude to our professor Mr. Sashi Kumar and our Head Of The Department Dr T.Adilaxshmi, who gave us an opportunity to do this project on the topic Student Information Management. This helped us in exploring new features in java and helped us foster.

We are thankful to and fortunate enough to get constant encouragement, support and guidance which helped us in successfully completing our project work.

We are pleased to acknowledge your valuable guidance during the course of this project.

Introduction

Student Information Management System application is for Institutes, faculty and students to organize, connect and view their statistics from anywhere. It is a user friendly desktop application, by which students can view their performance in Examinations by simply entering their roll numbers.

Achieving this objective is difficult using manual record systems is difficult, as it is redundant and collecting relevant information may be very time consuming. All these problems are solved by this project.

Design Phase

The Program execution starts from main class, in which existing student data is retrieved from files which is done using deserialization and entered data is stored into files using serialization. When we execute, a JFrame is invoked for administrator login. If the administrator provides appropriate credentials then the administrator logs into the application, this leads to another frame which consists of adding faculty details.

After Adding Faculty details, the data gets stored into the array list of class Faculty from package faculty. Thereafter, a roll no check frame pops up, if the roll number entered exists in the student array list, then the admin can add GPA scores of that roll number. After addition, the main user interface i.e. Student Information Management System is displayed, in which admin can add Student details, view Student Details and can view merit list of Students.

Code Implementation

2. Faculty Details Entry Form

A screenshot of a web-based form titled "FACULTY DETAILS ENTRY FORM". The form is displayed within a window with standard OS controls (minimize, maximize, close) in the top right corner. The form contains several input fields and a submit button. The fields are arranged in two columns. The left column contains "Name" (text input with "Karthik"), "Qualificati..." (text input with "Ph.D"), and "Gender" (text input with "M"). The right column contains "Age" (text input with "34"), "Phone No" (text input with "6303611657"), and "Branch" (radio button group). The "Branch" group includes options for CSE (selected), ECE, EEE, IT, MECH, and CIVIL. A "Submit" button is centered at the bottom of the form.

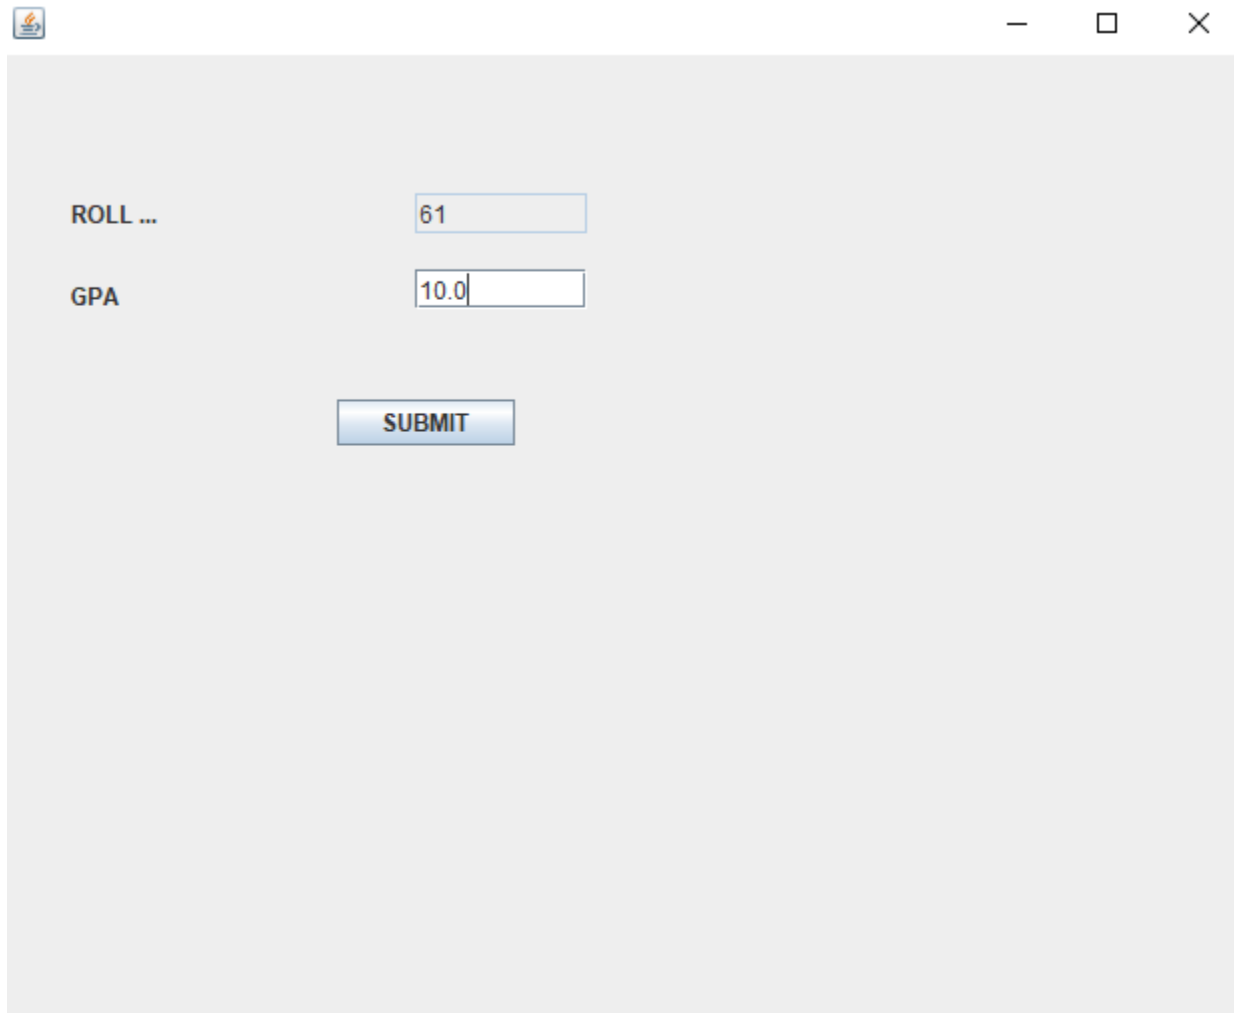

FACULTY DETAILS ENTRY FORM			
Name	Karthik	Age	34
Qualificati...	Ph.D	Phone No	6303611657
Gender	M	Branch	<input checked="" type="radio"/> CSE <input type="radio"/> ECE <input type="radio"/> EEE <input type="radio"/> IT <input type="radio"/> MECH <input type="radio"/> CIVIL
<div>Submit</div>			

3. ROLL NUMBER CHECK

A screenshot of a Java Swing window titled "ROLL NO CHECK". The window has a standard title bar with a small icon on the left and three control buttons (minimize, maximize, close) on the right. The main content area is light gray. At the top center, the text "ROLL NO CHECK" is displayed. Below this, on the left, is the label "ROLL ...". To the right of the label is a text input field containing the number "61". Below the input field is a blue button with the text "CHECK" in white capital letters.

4. GPA ENTRY FORM

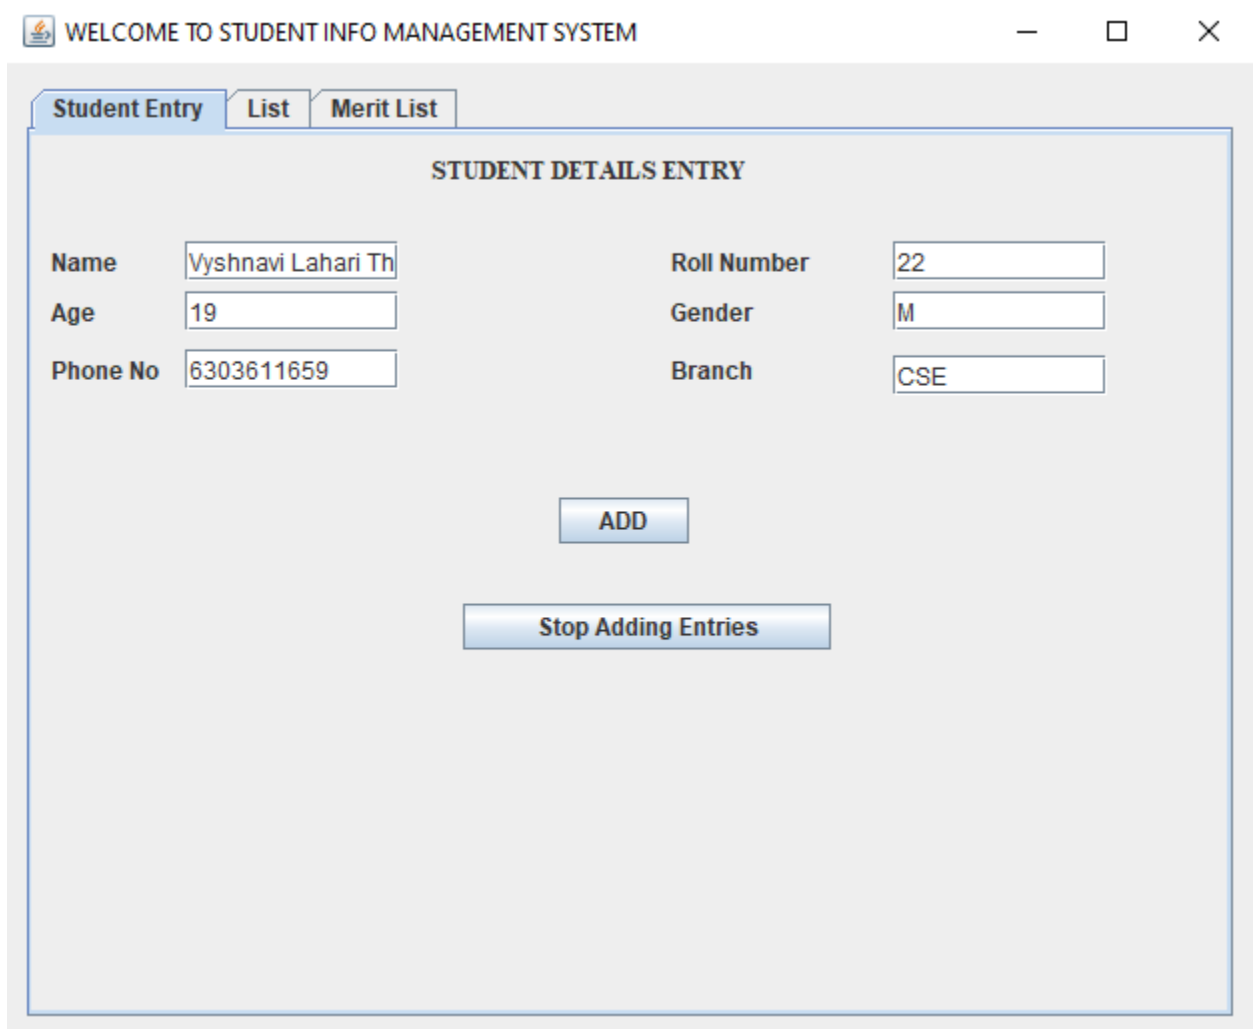

A screenshot of a GPA Entry Form window. The window has a title bar with a small icon on the left and standard minimize, maximize, and close buttons on the right. The form itself is light gray and contains two input fields. The first field is labeled "ROLL ..." and contains the number "61". The second field is labeled "GPA" and contains the number "10.0". Below these fields is a blue "SUBMIT" button.

ROLL ...	61
GPA	10.0

SUBMIT

5. WELCOME TO STUDENT INFORMATION MANAGEMENT SYSTEM

The screenshot displays a software window titled "WELCOME TO STUDENT INFO MANAGEMENT SYSTEM". It features three tabs: "Student Entry" (selected), "List", and "Merit List". The main content area is titled "STUDENT DETAILS ENTRY" and contains a form with the following fields:

Field	Value
Name	Vyshnavi Lahari Th
Age	19
Phone No	6303611659
Roll Number	22
Gender	M
Branch	CSE

Below the form, there are two buttons: "ADD" and "Stop Adding Entries".

Conclusion

Through this project, we would like to help Institutes to maintain their Faculty and Students Information in an organised manner which is low cost when compared to manual student management systems, which costs a lot of money. This application is developed using Java Swing. Students can view their statistics, and foster their career by studying better in the upcoming examinations.
